*When setting up a new timer function, make sure the Wi-Fi plug is connected to your home/office router, and that the Wi-Fi plug is plugged into a 120Vac wall outlet. The Wi-Fi plug will also remember programmed timers when removed from power.

NOTE: If you preprogram it and move it to a different area with completely different WiFi signals, the Wi-Fi plug will attempt to connect to one of these unsuccessfully. This will make the preprogrammed timer NOT function. In this case, you may have to RESET the Wi-Fi plug and set it to a router in the area.
